Portable Modulares: The CAM Series

Perfect for trade shows, presentations, meetings, and other events, our **CAM Series** line of portable modular display systems allows you to mix and match your messages.

Five pieces combine to create one big, beautiful message.

Versatile Configurations & No Tools Required

The **CAM Series** offers you the flexibility of different frames and sizes. Frames also "fit together" so that you can create small or large displays to suit your needs.

A sturdy, but lightweight, frame, means you'll save time and money. No drayage and labor fees.

Lower shipping costs.

Systems for a 10 x 10 space only weigh around 30 pounds.

The high-quality, aluminum frames snap together easily and without any tools.

Bright Graphics

The full color, dye-sublimated “pillowcase” graphic slips easily over the frame, zipping along the bottom. Double-sided printing is also an option, so you can “flip” your messages throughout the event.

An 8' flat system for a 10 x 10 space...

...can quickly be configured into a 10 x 30 inline.

Great Accessories

Our 40" flat **CAM Display with Monitor Stand** features quick, easy setup and a beautiful, large graphic.

This small **Telescopic Monitor Stand** is a great addition to any booth.

The hard shell shipping case transforms into a counter display using the included printed case wrap.
